Capacitive Palm Button

- No physical pressure required to actuate switch—reduces the likelihood of wrist injury caused by repetitive motion.
- Excellent sensitivity—sensor is designed to operate even if operator is wearing gloves.
- RFI Immunity—special circuitry inhibits output in the presence of RFI that would otherwise cause false triggering of output.
- AC version is UL Recognized—meets the applicable requirements in the proposed first edition of UL 991.
- Saves time and money.
  - Easy mounting in a single hole.
  - Wiring is simplified because terminals are clearly identified and easily accessible.
  - No special power supplies are required because switch is available in either 120 VAC or 24 VDC versions.

Description

The TouchStart™ is an ergonomic alternative to a mechanical palm button switch. These switches are often used to cycle industrial machinery such as punch presses. Unlike mechanical switches, which can require substantial force to operate, the TouchStart requires no actuation force. It detects the operator’s hand and actuates its output relays with a mere touch of the button.

The design of the TouchStart includes circuitry to prevent false triggering from the presence of Radio Frequency Interference (RFI). The TouchStart has been tested by Underwriters Laboratory and is recognized under standard UL 991, “Standard for Power Operated Machine Controls and Systems.” This is the only UL standard dedicated to operator safety in press control applications. The requirements of UL 991 are in accordance with the following Standards:
- NFPA70 National Electrical Code.
- ANSI B11.1 Standard for the Construction, Care and Use of Mechanical Power Presses.
- OSHA Section 1910.217.

Important Installation Instructions

This sensor has been tested to meet requirements regarding safety devices. Before installing, refer to ANSI B11.1, B11.19, and OSHA 1910.217.

ANSI Standard B11.19-2010 gives the following definitions:

8.4.1.2 Two-Hand Trip Devices

Each two-hand trip device shall be designed and constructed to protect each hand trip control against unintended or inadvertent operation.

The two-hand trip device shall have the individual hand controls arranged by design, construction, or separation to require the use of both hands for actuation.

The two-hand trip device shall be designed and constructed to require concurrent operation of both hand trip controls to initiate the machine cycle.

When used in single cycle mode, the two-hand trip function shall incorporate an antirepeat feature.

8.4.1.3 Two-Hand Control Devices

The two-hand control device shall have individual hand controls arranged by design, construction, or separation to require the use of both hand controls for actuation.

The two-hand control device shall be designed and constructed to protect each hand control against unintended or inadvertent actuation.

The two-hand control device shall require the concurrent actuation of both hand controls within a certain time limit before initiating hazardous motion.

Release of either hand control during the hazardous portion of the machine cycle shall initiate a stop command. Release and reactivation of both hand controls is required before motion is reinitiated.

Components, subassemblies or modules of the device shall meet the requirements of 6.1.

Rings or shrouds are commonly used to prevent palm-actuated buttons from unintentional actuation. Precautions in design or installation are needed to prevent actuation of two buttons by the use of one hand and the elbow of the same arm and to inhibit other circumvention of the two-hand requirement.

The device shall be located at a distance from the nearest hazard such that the operator cannot reach the hazard with a hand or other body part before cessation of motion of the hazardous portion of the machine cycle. Descriptions of formulas for distances between the switches and from nearest hazard can be found in American National Standards Institute (ANSI) B11.1 and B11.19-2010.
Description (continued)

Since each two-hand control or trip application is different the user needs to make sure that all Occupational Safety and Health Administration (OSHA) and American National Standards Institute (ANSI) requirements are followed. This device shall be installed such that the distance between the terminal connections of the palm button switch with leads installed and a dead metal part (including the enclosure) is a minimum of 1/4 inch.

**Warning!**

This product may cause substantial personal injury or property damage if it is not installed and used in accordance with the manufacturer's instructions and in accordance with regulations of the Occupational Safety and Health Administration Part 1910.217, the procedures prescribed by the American National Standards Institute B11.1 and B11.19, and all other applicable regulations, procedures and codes. The manufacturer shall not be responsible nor liable for any injury or damage resulting from use of the product in any such applications or the failure to comply with any such regulation, procedure or code.
Terms and Conditions of Sale

1. Offer, Acceptance. These terms and conditions (these "Terms") are deemed part of any quotation, purchase order, markups, purchase acknowledgments, catalogs, manuals, brochures and other documents, whether electronic or in written form, for purchase of product or service by Buyer ("Buyer") from Omron Electronics LLC and its subsidiary companies ("Omron"). Omron objects to any terms or conditions proposed in Buyer's purchase order or other documents which are inconsistent with, or in addition to, these Terms.

2. Prices, Payment Terms. All prices stated are current, subject to change with or without notice. Buyer is responsible for the payment of all invoices in the order submitted, with the exception of the "Products" ordered by Buyer. Buyer shall pay to Omron for the Products the purchase prices agreed, plus applicable duties, taxes, and other charges, including freight, insurance, and delivery charges. Buyer is responsible for the payment of invoices to the extent of any discount, if any, in accordance with Omron's payment terms and conditions. Buyer may not have any past due amounts due to Omron.

3. Interest. Omron, at its option, may charge Buyer 1-1/2% interest per month or the maximum interest rate allowed by law, whichever is less, on any balance not paid within the stated terms.

4. Orders. Omron will accept no order less than $200 net billing.

5. Governmental Approvals. Buyer shall be responsible for, and shall bear all costs involved in, obtaining any government approvals required for the importation or sale of the Products.

6. Taxes. All taxes, duties and other governmental charges (other than general real property and income taxes), including any interest or penalties thereon, imposed directly or indirectly on Omron or required to be collected directly or indirectly by Omron for the manufacture, production, sale, delivery, importation, conversion, conversion or use of the Products sold hereunder, whether or not such taxes, duties or governmental charges are mentioned herein, shall be paid directly by Buyer, unless otherwise stated in writing by Omron.

7. Warranty. Omron Company shall not be responsible for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. No warranty or representation is given orally or in writing, relating to any Products or services (collectively, the "Products") and no provision may be changed, modified or altered in any way without written consent of Omron. Omron will package Products as it deems proper for protection against normal handling and extra charges apply to special conditions. Buyer shall return to Omron within 30 days of receipt of shipment and include the original transaction number on any unshipped portions of outstanding orders. Payments for Products are due net 30 days unless otherwise stated in writing by Omron. Buyer may not set off any amounts due to Omron against any amounts due from Omron. (a) Exclusive Warranty. Omron MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES AND AGREES THAT NEITHER OMRON ELECTRONICS LLC NOR ANY DIRECT OR INDIRECT SUBSIDIARY OR AFFILIATE THEREOF MAKES ANY EXPRESS OR IMPLIED WARRANTY OR REPRESENTATION WITH RESPECT TO THE PRODUCTS.* (b) Limitations. Omron's sole obligation hereunder shall be to deliver the Product, and Omron will replace it (in the form originally shipped with Buyer) for non-conforming Product. (i) repair the non-conforming Product, or (ii) repay or credit Buyer an amount equal to the purchase price of the non-conforming Product; provided that in no event shall Omron be responsible for (i) any consequential loss, damage, costs or expenses (including attorney's fees and expenses) related to any claim, investigation, litigation or proceeding (whether or not Omron is a party) which arises out of or is alleged to arise from Buyer's acts or omissions under these Terms or in any way with respect to the Products. Without limiting the foregoing, Buyer (at its own expense) shall indemnify and hold harmless Omron, its directors, officers, employees and agents from and against all liability, costs, and expenses (including attorney's fees and expenses) related to any claim, investigation, litigation or proceeding (whether or not Omron is a party) which arises out of or is alleged to arise from Buyer's acts or omissions under these Terms or in any way with respect to the Products.

8. Indemnities. Buyer shall indemnify and hold harmless Omron Companies and their employees from and against any Third Party claims or costs of any nature occurring before delivery to the carrier must be presented in writing, relating to the sale of products or services (collectively, the "Products") in any way, whether written or oral, relating to the Products, and no provision may be changed, modified or altered in any way without written consent of Omron. Refundability of products is determined by Omron, at its option, only if Buyer has returned products in good condition to Omron and shipped to Omron, at Buyer's expense, within 30 days of receipt of shipment and include the original transaction number on any unshipped portions of outstanding orders. Failure of Omron to provide a refund shall not cause any action brought against such Companies to the extent based on a claim that any Product made to Buyer specifications infringed intellectual property rights of any other party.

9. Property, Confidentiality. Any intellectual property in the Products is the exclusive property of Omron and may not be reproduced or used in any way without the written permission of Omron. Without notifying any of the Products to the Products are confidential and proprietary, and Buyer shall limit distribution thereof to its trusted employees and strictly prevent them from disclosing such information to any third party.

10. Export Controls. Buyer shall comply with all applicable laws, regulations and licenses regarding the export of products or information; and (iii) sale of products to "forbidden" or other proscribed persons; and (ii) disclosure to non-citizens of products or information.

11. Miscellaneous. (a) Waiver. No failure or delay by Omron in exercising any right or notice of noncompliance or infringement the Parties shall be bound by or effectual under these Terms shall constitute a waiver or otherwise than by express writing, relating to the Products, and no provision may be changed, modified or altered in any way without written consent of Omron. Buyer shall limit distribution thereof to its trusted employees and strictly prevent them from disclosing such information to any third party.

12. Force Majeure. Omron shall not be liable for any delay or failure in delivery resulting from causes beyond its control, including earthquakes, fires, floods, strikes or other labor disputes, shortage of labor or materials, accidents to machinery, acts of sabotage, riots, delay in or lack of transportation or the refusal of carriers to transport, provided that Omron shall give Buyer written notice of the cause of such delay or failure as soon as it becomes known.

13. Cancellation, Etc. Orders are subject to rescheduling or cancellation at Omron's option even if Buyer has paid or assumed other obligations.

14. Change in Specifications. Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to charge change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Products may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please contact your Omron representative at any time for current specifications of purchased Product.

15. Errors and Omissions. Information in this document has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

Certain Precautions on Specifications and Use

1. Suitability of Use. Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying known limitations and any cautionary or warning statements applicable to the Product. Omron's statement that its Products are suitable for use in a particular application is not a warranty that the Product will be suitable for such use, and Omron expressly disclaims any representations or warranties as to the suitability of the Product for any particular application. Omron does not represent that the Product will be suitable for any particular application, which is a determination that is the sole responsibility of the Buyer or any other user of the Product. Omron does not represent that the Product will be suitable for any particular application, which is a determination that is the sole responsibility of the Buyer or any other user of the Product.

2. Proprietary Rights. Omron Companies shall not be responsible for the effect of any changes to the Products due to combination with other products. This includes, but is not limited to, software, hardware, software modules, and other products, which may be furnished to Buyer.

3. Performance Data. Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

4. Change in Specifications. Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Products may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please contact your Omron representative at any time for current specifications of purchased Product.

5. Errors and Omissions. Information in this document has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
